

VEDULA SAI VINAY

+91 8019132946 • Visakhapatnam • vedulasaivinay@gmail.com • [LinkedIn](#) • [GitHub](#) • [LeetCode](#) • [CodeChef](#)

SUMMARY

Full-Stack Developer proficient in building scalable web applications with React, Node.js, and MongoDB, and designing Generative and Agentic AI systems leveraging LLMs, RAG pipelines, and LangChain. Strong foundation in system design, REST APIs, and real-time communication with a competitive programming background.

EDUCATION

Vignan's Institute of Information Technology, B.Tech — CSE (Data Science)
CGPA: 8.53 / 10.0

2023 – 2027

SKILLS

Languages Java, JavaScript, TypeScript, SQL
Frontend HTML, CSS, React, Tailwind CSS
Backend / AI Node.js, Express.js, REST APIs, LangChain, LLMs, RAG, Vector Embeddings, Pinecone
Databases MongoDB, MySQL
Tools Git, GitHub, VS Code, Postman

PROJECTS

Clarity AI — Agentic RAG System for Legal Documents [\[github\]](#)

Stack: Node.js, TypeScript, Express.js, LangChain, GPT-4o, text-embedding-3-small, Pinecone, MongoDB, React

- Built a production-grade agentic RAG system that ingests legal PDFs, chunks and embeds documents into Pinecone using 500-token overlapping windows, and deploys a GPT-4o agent with 3 custom tools (searchClause, summarizeClause, explainRisk) to answer semantic queries over unstructured contracts.
- Engineered a full agent loop where the LLM autonomously selects tools, retrieves top-5 relevant chunks via cosine similarity search, and streams answers via SSE — validated across 20+ legal documents with zero cross-user data leakage via per-user Pinecone namespaces.
- Implemented JWT-secured upload and query routes with isolated MongoDB schemas (User, Document, ChatHistory), reducing retrieval latency by ~40% over naive full-document LLM calls.

DevConnect — Real-Time Developer Collaboration Platform [\[github\]](#)

Stack: React, Node.js, Express.js, MongoDB, Socket.IO, Tailwind CSS, JWT, OAuth 2.0

- Built and deployed a real-time collaboration platform onboarding 30+ active users; supports live messaging, project sharing, and developer profiles secured with JWT and OAuth 2.0 (Google).
- Engineered WebSocket (Socket.IO) messaging achieving <200ms latency and REST APIs serving 10+ endpoints; built a fully responsive Tailwind UI reducing mobile bounce rate by ~25%.

AI CodeBase Analyzer — LLM-Powered Repository Intelligence [\[github\]](#)

Stack: Node.js, LangChain, LLMs, GitHub API, RAG

- Developed an AI tool that analyzes GitHub repositories by extracting file trees, code quality metrics, and module coupling patterns, generating structured improvement reports via LLM reasoning — tested across 20+ repositories.
- Built a scalable Node.js service layer to batch-fetch files from the GitHub API and feed structured JSON context to the LLM, reducing average analysis time to under 8 seconds per repository.

Personal Finance Tracker [\[github\]](#)

- Full-stack finance app to track income, expenses, and savings goals with interactive Chart.js dashboards displaying category-wise spending trends across 5+ visualization types.

EXPERIENCE

Frontend Developer | ApexPlanet, Visakhapatnam

Jun 2025 – Jul 2025

- Built 10+ reusable React components and responsive UIs, improving page load consistency and reducing UI bug reports by ~30% across product modules.
- Integrated frontend with REST APIs enabling dynamic rendering; delivered 3 major features within weekly sprint cycles in close collaboration with backend engineers.

ACHIEVEMENTS & CERTIFICATIONS

- Solved 800+ DSA problems on LeetCode (max rating: 1615) and 400+ on CodeChef (2 Star, rating: 1431).
- NPTEL Certification — Cloud Computing, IIT Kharagpur.
- Cisco Certification — Web Technologies (HTML, CSS, JavaScript).
- Completed Virtual Eduskills Internship — Artificial Intelligence & Machine Learning.
